- Construction
- Facilities Management
- Infrastructure
- Media
- International Services
- Manufacturing
- Petrochemical and Power
- Public sector
- Scaffolding
- Utilities

Our training portfolio includes courses for both management and operatives – all delivered by our experienced staff – either on site, or at one of our purposebuilt training centres, located in Humberside and the East Midlands or our international centres in the Middle East, Far East and beyond.

Our proven consultancy services include independent site audits, monitoring and inspections and a full health and safety consultancy service delivered by our network of competent health & safety professionals.

We are proud of our reputation for quality and service and our ability to deliver reliable, independent support at all levels.

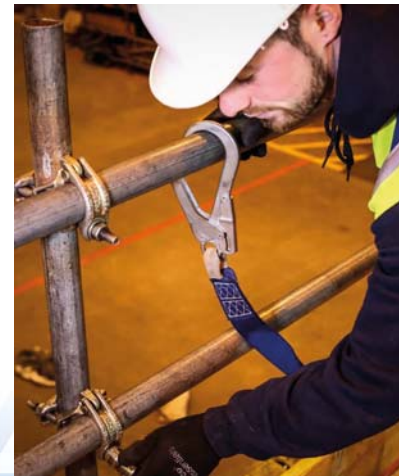

**SAMSUNG HEAVY INDUSTRIES**

"Samsung Heavy Industries Co. Ltd, would like to express their sincere gratitude to Safety & Access Ltd, for their scaffold auditing services and training. Safety & Access Ltd. have provided scaffold auditing services and the delivery of scaffold skills training to employees to a very high standard. In line with these activities, we can enhance our Scaffolding level internally and fulfil our client's expectation"

**WILLMOTT DIXON**

"The Willmott Dixon Group have used Safety and Access for many years for training and site visits. Their expert approach and advice has been invaluable to our site teams and safety personnel."

**Celebrating 25 Years of Supporting Industry**

The Company was formed as Scaffold Inspection Services (SIS) Ltd in 1991, to provide an independent scaffold inspection as a joint venture between the International Scaffolding Company SGB and Hinton & Higgs Ltd, Europe's largest Construction Health Safety Consultancy. The range of services soon expanded to include Scaffold Inspection training, the Construction Industry Scaffolders Record Scheme (CISRS) range of skill training, scaffolding consultancy advice and PASMA lightweight aluminium tower scaffolding training. In late 1997 the directors undertook a management buyout of the Company that was then re-named Safety and Access Ltd

In January 2004 Safety and Access Ltd, in response to increasing demand from clients existing and new, opened a dedicated Management Training Facility at its Nottingham head office and training centre with an extended capacity of up to 40 attendees.

Safety and Access Ltd continues to grow and expand its services to all industries and in mid-2012 they opened an additional fully accredited training facility in the Humber region offering CISRS and PASMA accreditation for work at height and scaffolding related training.

In 2013 the Company further expanded its international training portfolio by opening CISRS facilities for international accreditation in the Middle East and Far East. Further international expansion plans are in place for other regions.

Today Safety & Access Ltd are regarded as one of the leading scaffolding and work at height training providers and consultancy services specialising in the UK and International markets. The company can include some of the largest UK and International businesses amongst its client base.

The Joint Managing Directors Ray Johnson and Rick Statham are very proud of the achievements that the company has made over the years and are confident that the business, with the drive and support of the highly competent team will continue to expand and diversify.

**Nationwide Training Facilities** - As well as the ability to deliver training courses on site at client's facilities, we have associate facilities throughout the UK where we can provide regional support.

**Nottingham / North East Lincolnshire** - Training and Competence is very important in today's work environment with many regulations requiring employers to ensure that employees are adequately trained and competent to work. A wide range of training courses are available.

**Scaffolding** - Training is available as CISRS Scaffold Training for Tube and Fitting (NVQ), System Scaffolding, Scaffold Inspection and Supervision, as well as COTS H&S Awareness. PASMA training is also available throughout the UK and at our registered centres. Additional training includes SG4, TG20 and Collective Fall Prevention. We can also deliver site based training under the CISRS System Scaffolding Product Training Scheme (SSPTS). This training is available nationwide for all major proprietary systems.

**CISRS Level 2 Scaffolding Apprenticeship** - This 2 year programme with 11 weeks of practical training delivered at our training centres, enables candidates aged 16-23 an opportunity to become qualified scaffolders whilst gaining practical experience with an employer. On completion of this framework you will gain qualifications including CISRS Scaffolder card and PASMA certification. Generous employer grants are also available.

**Work at Height** - Work at height awareness training is available in addition to the use of low level access equipment, the use of safety harnesses and general safe working at height applications

**Safety Management Training** - A wide range of management and supervisory training is available including CISRS Basic and Advanced Scaffold Inspection, CISRS Supervisor, Safe Management of Work at Height Operations and Scaffolding Appreciation

**CISRS International Training Services** - We can undertake Scaffolder Skills and Scaffold Management Training to international standards throughout the world. We have also successfully opened CISRS Overseas Training Operations in the Middle East and the Far East which enables us to offer CISRS accredited training across many parts of these regions.
